

Educational Adventures encourages parents to watch the Danger Rangers with their children so the whole family can learn the Danger Rangers' "Safety Rules!"

Here's a few questions you can review with your family after watching "Safe & Sound" to make sure they are Danger Ranger Ready!

1. What can happen to your ears if you listen to music too loud?
2. What should you wear in your ears if you're going to be somewhere that is loud, like a concert?
 - A. Headphones
 - B. Earplugs
 - C. Nothing. It's OK to be in a loud place without any protection.
3. How do people with hearing loss communicate with others?
4. How do you know if the volume is too loud?
5. When should you wear safety goggles?

Learn more about children's safety and how you can make learning fun at www.DangerRangers.com

1. You could damage your hearing when you listen to music too loud.
 2. B. earplugs.
 3. They can use sign language to communicate.
 4. If you can't hear someone who is within several feet of you or have to shout over a noise to be heard, chances are that you may be experiencing dangerous noise levels. If your ears are ringing, or if speech sounds muffled or stuffy to you, tell an adult right away.
 5. You should wear safety goggles when using child science or hobby kits, or when you play sports such as baseball or racquet sports. Wear sunglasses (that block both UVA and UVB rays) when out in the sun. Never play with slingshots, darts, bows and arrows or guns.
